BOOM FAQ

How do I access the boom cards?

Click the link that says, “Click here to access your new Boom Cards™ deck!” in the *ACCESS BOOM PDF* included with your purchase download. Boom will prompt you with the rest.

How do I send to students?

When you make a teacher account you will make a classroom page. You will add students to the classroom and set their login information. Then you share that with the student. Once you have the students in your “classroom” you can assign them decks based on the student’s ability and needs. You can watch a video tutorial [here](#).

Is the order of cards the same every time?

The order will be randomized each time the student opens a Boom Cards™ deck.

Can I upload to Google Classroom? You would use a Fast Pin to send students a link to the deck that would open without login.

You can learn more about using Boom in Google Classroom [here](#).

Why do my Fast Pin links expire?

Fast Pins are links that allow students to click and start playing without logging in. Fast Pins expire in 14 days and do not give you student data. To get data and links that do not expire add your students to your classroom and assign the Boom Cards™ decks.

Do I need a paid account?

You can always use Boom for free and get student reporting for up to 5 students. For more students and the ability to assign hyperlinks that do not expire you will need a paid account.

What are custom play settings?

Custom play settings allow the teacher to decide if they want to show students the correct/incorrect answers or allow for multiple plays. You can also decide how many cards will be in a Boom Cards™ deck for the student each time they play.

How do I select the amount of cards a student plays?

In your library, you can click the blue arrow to select custom play settings on a Boom Cards™ deck.

Can I print Boom Cards? You can print Boom cards for personal classroom use only, but they are created with digital in mind.

How do I differentiate boom cards? In your library, you can use the hide card option if there are cards that are too hard, too easy, or that you simply do not want to include at this time. This allows you to differentiate.
